**50 WATTS**  
**30 to 512 MHz**  
**JITC Certified**

**AR Modular RF's Model AR-50** is a portable, lightweight, RF sensing, band-switching, RF booster amplifier for multi-band operation compatible with **VHF/UHF/LOS/SATCOM** tactical radio equipment supporting legacy, proprietary and emerging waveforms with optional, full-duplex support for **MUOS**. Operation covers 30 to 512 MHz using high speed, auto-switching harmonic filters and is SINGARS and HAVEQUICK compatible. An integrated DC/DC converter supports a wide range of input voltages while maintaining constant output power. Built-in protections guard against antenna mismatch, over-temperature and accidental input power polarity reversal. Made to last, the **AR-50** is packaged in a rugged, IP67 rated, 2-piece aluminum enclosure. Optional fan kit, shock mount kit and interface coaxial cables are available.

- Three Models: **AR-50** (Standard), **AR-50C2** (High Input Power), **AR-50M** (MUOS Support)
- Radio vendor independent design
- Supports single & multi-band radios with just an RF connection
- Automatic high-speed filter switching for SINGARS & HAVEQUICK modes to assure interference free operation
- Dedicated LOS and SATCOM antenna ports
- Multi-level RF output power switch for SATCOM
- LOS/SATCOM LNA ON/OFF selection
- Internal LNA with co-site filtering for SATCOM
- ASCM Compatible
- JITC/DAMA Certified with AN/PSC-5D & AN/PRC-117G
- JITC/IW Certified with AN/PRC-117G
